Company Profile

DLV - Traditions, Quality, Guarantee

DLV company is gaming software and casino type equipment manufacturer and operator with the head office in Latvia. Established in its home market since 1994, DLV has been persistently increasing production capacity and manufacturing various kinds of production using all up-to-date technologies. Owing to this fact the company strengthened its position on the local gaming market and became positively developing enterprise with concrete objectives on emerging foreign markets.

So far, DLV gaming machines are being purchased and operated in 33 countries of Europe, Asia, South, Central and North America. Our product innovations and updates for each market demands yield for the company a reputation of adequate and suitable casino management decisions provider. Products certification has the leading role here as support of competitive ability of the company. This fact makes DLV paying a lot of attention to the software and hardware being certified in the most reliable institutions, such as TUV for the cabinets and platform, GLI and NMI for the gaming programs and other as BMM, ITCq and SIQ for different jurisdictions.

Certification has become an integral business process because of constantly growing products capacity and variety. DLV software products division embraces DIAMOND GAMES Premium multigame program series with different games and configurations, as well as Jewel Jackpot series on the base of company's own jackpot progressive system games with different features. Some of the multigame programs are available in different languages. Among the hardware developments the cabinet line of upright and slant top machines each with unique design should be highlighted.

The company is moving forward to create new approaches in gambling industry, to develop its products, to provide high security peripherals, to have an outstanding style of business. Company's strategy is based on meeting the demands of our clients and partners with a wide range of equipment and qualitative service, besides that, DLV is valued among the clients and partners thanks to managing philosophy declaring to perform professionally in every company's business activity.

Successfully working enterprise always associates with a professional management. Leadership of DLV are constantly engaged in the re-structuring, financial improvement, research the best use of the market abilities, investigate forecasting changes in gaming industry, production management, management of commercial activities, marketing, information resources, etc. Company devotes a great attention to increase the professional skills of the staff and incessantly cares about maintenance of the modern and flexible organization style. At the moment number of employees in DLV exceeds the number of 400.

Company's technical staff provides any assistance in the repair of gaming equipment in Latvia and abroad. Service center are presented by the top level expert team having a long-term experience in monetary, credit game devices and other entertaining equipment service. Company DLV has a regular professional training schedule for engineers and operators with aim to maintain their level of skills and knowledge accordingly developing gaming industry.

Progressive jackpot system by "DLV"

Jewel Jackpot is progressive jackpot system that can act as a standalone or as network-based progressive system. Jewel Jackpot features 3 levels of progressives – Diamond, Ruby and Emerald. Five different configurations of starting values for each level are available for operator selection.

Jewel Jackpot system is considered for operating in gaming machines with Touch Screen installed. All games included in multigame machines supporting Jewel Jackpot are designed for easy and simplified control of the game process.

For the reels games extra "Jewel Jackpot" symbol is added to the reels, which appears on top of the regular main game symbols. Main game symbols with "Jewel Jackpot" play according to the paytable seen on top screen during the game. "Jewel Jackpot" symbol is scattered and appears on 1st, 3rd and 5th reels.

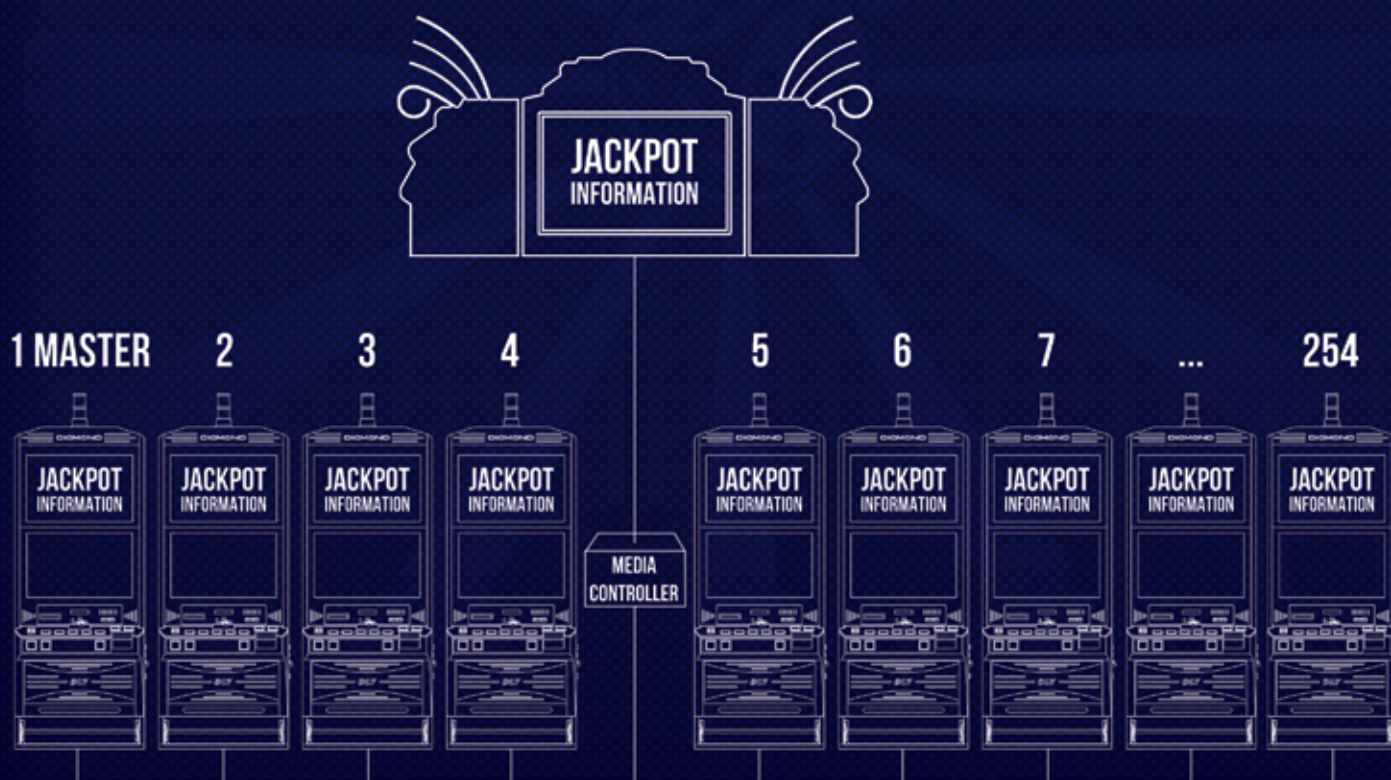

When "Jewel Jackpot" symbols appear anywhere on 1st, 3rd and 5th reels in the main game, Jewel Jackpot bonus game is started, where player is guaranteed to win one progressive level. In the bonus game player gets 15 jewel boxes for selection. Each selection will reveal jewel hidden in the box. Game continues until 3 diamonds, 5 rubies or 7 emerald jewels are collected, and then corresponding jackpot level is awarded. After the Jackpot winning amount is shown on the screen, it is transferred to the credit meter of the gaming machine. DLV has two different game programmes on the base of the jackpot system.

Progressive jackpot system by "DLV"

Jewel Jackpot allows connecting up to 254 gaming machines into the jackpot network without using separate controller. Thus one of machines is acting as "Master" and replaces the controller; all other machines are connected to "Master". All the jackpot information is shown on the second screen of all machines connected to the jackpot network.

Separate media controller is used when standalone display is required for displaying jackpot information.
